

Bates Square bag

Polywoven Dunnage Bag System

Prevent Cargo Damage

Innovative square dunnage bag that can be used in voids up to 760mm. AAR Approved.

Reliable Performance

Strong quality polypropylene material with an inner film bladder. Water resistant and airtight.

Time & Cost saving

Quick and safe installation. Clean and cost effective. Fast loading for shipper. Fast unloading for receiver.

Fast and Simple Inflation

Operator friendly inflation using compressed air or blower systems. Unique valve system.

Bates Square Bag Polywoven Dunnage Bag System

Bates Square bag is used to secure cargo, which is to be transported by container, truck or rail wagon to prevent load movement. The Square airbag is manufactured with gussets that open up when the airbag is inflated. This allows for inflation in voids of up to 760mm wide. Available in two sizes and are AAR approved. The patented Striker valve allows for very simple and fast inflation of the airbag system using a compressed airline or portable inflator.

Benefits and Features

- Maximizes Load Security**
 Square bags offer optimal contact between airbag and the load.
- Reduces Loading and Unloading Time**
 Placing the airbags is a very fast and time saving way of securing your goods before departure. And when unloading the goods the airbags are simply deflated by using using the deflation cap.
- Environmentally Friendly Materials**
 Strong quality polypropylene material which is recyclable helping to minimise environmental footprint.

Inflation with Compressed Air or Portable Blowers

Inflation with compressed air or portable blower systems.

Securing single pallets

Inflated in position

Optimum contact between airbag and load

Certified Manufacturing Plant

ISO 9001 Quality Management System
