

Inflation Equipment

Heavy, Medium, Reuse & Cargo Protector

Light weight & operator friendly

Light weight, easy and simple to use. Inflation equipment designed with the user in mind.

Reliable performance

Made from durable materials for use in an industrial environment.

Suitable for various applications

Various spares and accessories available to suit the different airbag valves.

Fast & simple inflation

Quick and easy to connect to your air source. Range of inflators for fast and simple inflation.

INFLATION EQUIPMENT

Heavy, Medium, Reuse & Cargo Protector

We recommend that you always use the original filling equipment to inflate Bates Cargo-Pak airbags. Inflation times are shown on the separate datasheets for each type of airbag.

The choice of inflation equipment, hose dimensions and length of hose all have an influence on the filling time.

Benefits and features

Time saving inflation times

Easy access and quick inflation using the standard or quick inflators. Quick inflator allows access to the valve from the side, which makes it very easy to use in small gaps.

Improved usability

Easy connection to airlines with hose and clip or by using hose connectors and snap couplings. Easy replacement of handles and nozzles.

Manometers available

Manometers with protective casing available in two ranges. Filling nozzles and other accessories can be ordered separately.

Compressed air

All types of compressors can be used to inflate Bates Cargo-Pak airbags. The compressor and tank capacity should be determined based on the need and actual use of the airbags.

The demand on the compressor and tank depends on:

- The number of airbags to be filled.
- The size of airbag. The gaps between the cargo.
- The required filling time.

Inflation using quick inflator

Inflation using standard inflator

Bates Standard Inflator

Bates standard inflator (blue metal nozzle)

- Ensures an optimal and quick filling time.
- Very easy to connect to the hose with a clip.
- Supplied as standard with snap coupling.

Bates Standard inflator
Item Number 096072

Standard Inflator fitted with either:

Bates Standard inflator c/w Ø40 mm manometer
Item Number 096073

Bates Standard inflator c/w Ø63 mm manometer
Item Number 096086

Bates Quick Inflator

The advantages of using the Bates Quick inflator:

- Fastest filling time in the market.
- Inflation from the side making it easy to access to inflate in small gaps.
- The lock coupling acts as an extension of your arm and makes it very easy to hold the airbag in the gap during inflation.
- Bates Quick inflator is supplied with a 1/2" snap coupling to ensure optimal and fast filling time. Very easy to connect to the hose with a clip.
- Bates Quick Inflator is available with a hose and manometer Ø40mm (scale 0-2,5bar) or Ø63mm (scale 0-1,0 bar)

Bates Quick inflator
Item Number 096078

Bates Quick inflator with hose extension
Item Number 096077

Bates Quick inflator with hose & Ø40mm manometer
Item Number 096075

Bates Quick inflator with hose & Ø63mm manometer
Item Number 096088

INFLATION EQUIPMENT

Accessories

Filling nozzles & handles

	Filling nozzle, standard inflator, Blue & aluminium, 80mm Item Number 096061
	Lock coupling for Quick inflator Item Number 096054
	Handle for standard inflator (coupling not included) Item Number 096060
	Hose & lock coupling for Quick inflator Item Number 096079
	Handle for Quick inflator (coupling not included) Item Number 096074

Hose & connections

	1/2" hose (50m) Item Number 096035
	3/8" hose (50m) Item Number 096031
	1/2" clip Item Number 096036
	3/8" clip Item Number 096033

Certified Manufacturing Plant

Couplings with and without valve

	Hose connector for Standard inflator Item Number 096057
	1/2" snap coupling with valve for Quick Inflator Item Number 096051
	1/2" snap coupling without valve for Quick inflator Item Number 096050
	Male coupling for Standard/Flex inflator & Quick inflator for quick change between different inflators Item Number 096069
	3/8" snap coupling with valve for Quick inflator Item Number 096030
	3/8" snap coupling without valve for Quick inflator Item Number 096034

Distributor:

Striker Inflation

Inflation equipment

User Friendly

Lightweight user friendly inflation systems available for both paper and PPW airbags. Simple and easy to use.

Fast inflation

Fastest inflation taking advantage of venturi inflation. Save time during loading and securing.

Safety for user

Digital inflator to measure internal airbag working pressure. Low noise levels during inflation.

Portable systems

Portable inflator systems available for applications where no compressed air is available.

Bates Inflation Equipment

Flex, Flex Eco, Flex Plastic & Eco Protector

Light weight & operator friendly

Light weight, easy and simple to use. Inflation equipment designed with the user in mind.

Reliable performance

Made from durable materials for use in an industrial environment.

Suitable for various applications

Various spares and accessories available to suit inflation of the various airbags.

Fast & simple inflation

Quick and easy to connect to your air source. Range of inflators for fast and simple inflation.

BATES INFLATION EQUIPMENT

Flex, Flex Eco, Flex Plastic & Eco Protector

We recommend that you always use the original filling equipment to inflate Bates Cargo-Pak airbags. Inflation times are shown on the separate datasheets for each type of airbag.

The choice of inflation equipment, hose dimensions and length of hose all have an influence on the filling time.

Benefits and features

Automatic closure to prevent leakage

The big advantage with our patented valve is that it closes automatically after inflation. Furthermore it can turn 360° so it is possible to inflate it from all angles, which makes the Flex-system very suitable for narrow gaps.

Air release for quick adjustments

Bates Flex inflator is available with an air-release. The advantage of the air-release is that it is possible to let out air after inflation, then the airbag can be replaced if needed.

Improved ease of use

Bates Flex inflator is available with a click-on system which makes it possible to lock the inflator to the airbag so you can inflate using one hand. After inflation the inflator is released by a small push on the 'lock'.

Compressed air

All types of compressors can be used to inflate Bates Cargo-Pak airbags. The compressor and tank capacity should be determined based on the need and actual use of the airbags.

The demand on the compressor and tank depends on:

- The number of airbags to be filled.
- The size of airbag. The gaps between the cargo.
- The required filling time.

Flex inflator c/w air release

Flex air release valve

Bates Standard Inflator

- Ensures an optimal and quick filling time.
- Very easy to connect to the hose with the snap couplings.
- Supplied as standard with snap coupling.
- Filling nozzles and other accessories can be ordered separately.
- Bates Flex Inflator is available with a manometer Ø40mm (scale 0-2,5bar) or Ø63mm (scale 0-1,0 bar)

Bates Flex inflator with click-on & air release

Item Number 096259

Bates Flex inflator with click-on, without air release

Item Number 096248

Bates Flex inflator with 80mm nozzle

Item Number 096048

Bates Flex inflator with 150mm nozzle

Item Number 096056

Bates Flex inflator with 150mm nozzle and air release

Item Number 096059
